**Subject:** Does Angeles need memo re Hunters Point Parcel C ESD?  
**Attachments:** CTO0073\_Parcel\_C\_ESD\_Final.pdf

Dear John,

I'm sorry this is happening while I'm out of town and I have to burden you with shepherding this process.

Does Angeles need a memo from me or you before signing the Parcel C ESD? If so, should I use similar text to below & put on letterhead?

- Lily

**Subject:** FW: More context - FW: Hunters Point Parcel C ESD for your review

Dear Thanne,

Thank you so much for your kind offer to review on the plane on Mon night. That is going above and beyond, and I really appreciate it. Since Rachel is out today, I wanted to give you more context. I'm sure she can fill you in more on Mon when she returns on any legal issues that I may not understand. In the mean time, here is brief context:

The original ROD for Parcel C in 2010 called for a variety of remedies including excavation of soil at 31 locations with levels of contaminants of concern above RGs. A durable cover will be placed on the site as a barrier to exposure. Subsequently, the Navy proposed reducing the boundaries of excavation at four locations to and through increasing the RGs for metals (excluding mercury) and PCB's in soil to either Tier 1 (10 times the RG) or Tier 2 (5 times the RG) levels. Because the durable cover would prevent exposure, the cleanup would still achieve the original RAOs.

Rachel, Dan Stralka, John Chesnutt, Techlaw, and I have reviewed drafts, and the Navy has adequately addressed our review comments. Some key comments include the following:

- 1) The original draft did not acknowledge that RGs are changing. The final version does acknowledge that.
- 2) The original draft gave limited information comparing the levels found onsite to likely concentrations that could be naturally occurring in the native soil. The final draft addresses potential naturally occurring levels more fully.

I'm in Region 5 this week, but 7-4187 forwards to my cell, and I hope to have email access if you need any further information.

Thank you again for your help. I appreciate it!

- Lily

Hello All - Please find attached a pdf copy of the Final ESD which has already been printed for final distribution. I would appreciate it if you could get back to us on Tuesday so that the Final versions can be published along with the signature page. I will provide additional details on routing of the signature page once I know the status of your review.

Regards,

Tony K.
